## **Modern Equipment: On the Move**

**Modern Equipment Company, Port Washington, Wisconsin is pleased to announce their acquisition of a 165,000ft<sup>2</sup> manufacturing facility. “The new plant will enable us to manufacture our products in a more efficient manner and consolidate all operations under one roof” says President, Verne Socks. Modern Equipment’s previous space was 115,000ft<sup>2</sup>. “In order to meet the needs of our growing customer base, execute our business plan, and better serve our respected industries the move is a natural progression for us.”**

**Modern Equipment Company, a division of ALCO Industries, is a manufacturer of aluminum melting systems, metal holding and transfer equipment, iron cupolas and emissions systems, ladles, inert gas generators, custom tank & ASME pressure vessels, and contract fabrication and machining services.**
