Cupola Melt Systems & Metal Handling

Products and Services

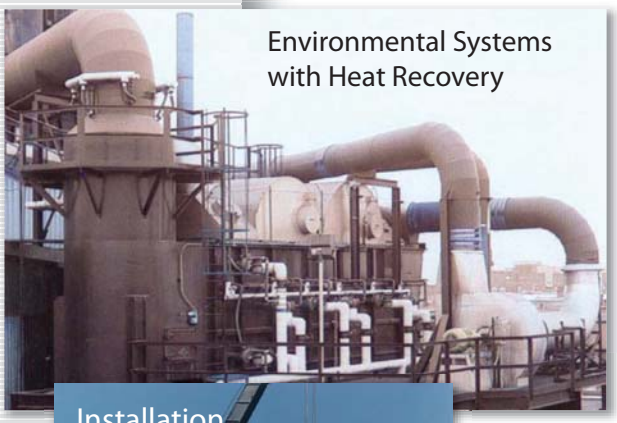
- Systems designed for MACT standard compliance
- High efficiency, water cooled cupolas
- Design services
- Environmental systems
- Material handling systems
- Molten metal delivery systems
- Electrical controls and integration
- Construction and installations

Complete System Development

Modern Equipment is a leader in innovative melt system designs; reliable, efficient exhaust gas combustion and energy recuperation design; cold charging; and hot metal systems, as well as advanced integrated process control.

The Modern Cupola Melting Center provides controlled high quality production of gray and ductile base irons at substantial cost savings and less environmental stress.

Modern Equipment is committed to providing the latest technology and foundry solutions, as well as upgrades of existing equipment and facilities, retrofits and rebuilds.



Environmental Systems with Heat Recovery
